---

Please **check** the tracks you may be interested in:

- Bioinformatics
- Biomaterials and Tissue Engineering
- Biomolecular
- Biomedical Product Design and Development
- Biomechanics and Neural
- Bioimaging

**Academic Objectives**

Please write a brief essay describing your academic objectives in bioengineering. Discuss the particular areas of focus within the track(s) you wish to study and indicate how and why you have decided to pursue graduate studies in your chosen field. You may also include relevant information about your academic background, research experience, and related work experience. This statement of objectives will be used by faculty in the track to evaluate your academic potential and to select graduate teaching/research assistants. Attach additional sheets if necessary.
